- Comments from students
 - There is a lot of sodium in the food here. It all tastes good but the sodium makes even healthy options feel heavy and bloating on the stomach. Is there any way this could be resolved?
 - *Response:*
 - Straws, Build your own sandwich station because the line gets way too big. Less laxatives and 24/7 ice cream.
 - *Response: We DO NOT put any laxatives in our food. If we added a create your own sandwich station we would run into the same problem that we currently have with the traffic and students making choices. Ice cream is always available unless the machine is out of product.*
 - Deli needs more buffalo chicken wraps. At the grill don't always use whole wheat buns. Get chocolate syrup for the ice cream. The chocolate chip, M&M and white chocolate chip cookies are awesome! When are we getting real dishes back? I can't cut the chicken with these knives. There should always be at least 1 plain pizza. The wok and the burrito station usually have a long line. I like the food but it's a long process ☹
 - Nacos should be added to the burrito station for students to choose from and enjoy. Making a naco is simple. Take 1 serving of nachos (with ground beef, nacho cheese, and anything else the student wants to add) and mix up the ingredients in a plate/bowl. Then pour all the ingredients and chips now evenly distributed into a large soft tortilla. Students eat it by holding the four sides up like a bag, the contents safely inside. Yummy! For reference, please visit the following: www.wikihow.com/make-a-naco
 - *Response: You are more than welcome to create nacos if you would like. We offer nachos on a daily basis and we have tortilla shells. Just ask the server to give you a tortilla shell on the side.*
 - I really loved the apple bunt cake. It reminded me of my grandma's apple cake. Please make this more often as it made me really happy. Thanks!
 - *Response: We are glad that you enjoyed it!*

 - Jen: Please use the tongs provided!

- SG:
 - Pasta- Can the sauce to pasta ratio be smaller? There is way too much sauce to pasta. Can we change the ladle there?
 - *We are going to see what is going on there. Very good suggestion with changing the ladle*
 - Popcorn chicken at the Lion's Den is too salty and still too much batter not enough chicken.
 - *Eric is going to look into seeing if this product changed from our supplier*
 - Burritos in TDubs are not coming with tomatoes. Can you look into this?
 - *Eric is going to talk to Carl to see what is going on. Cait followed up with Meghann and they discussed that tomatoes are included. This fix will be made immediately.*
